# E-Learning Mobile App

Industry:  
**Education**

Customer's web-site:  
**Under NDA**

## Project's Mission

Application designed for studying specific topics and passing tests at the end of each topic to check how well the information was retained by the students.

## Problems

The impossibility or difficulties of students to study in different conditions: when they are on the road, waiting for something, etc. Tests for checking newly learned material are not easy to create without any knowledge in programming technologies.

## Solution

A convenient application which is adaptable to any mobile device with clear and understandable UI. It allows to read information and check how information was learned. Adapt framework was used to allow to create study materials and tests without any programming knowledge. Backbone js allows to add skeleton of application and structure code in a simple and clear way.
